Bounce N

Bounce N / Charcoal / Sora SemiBold

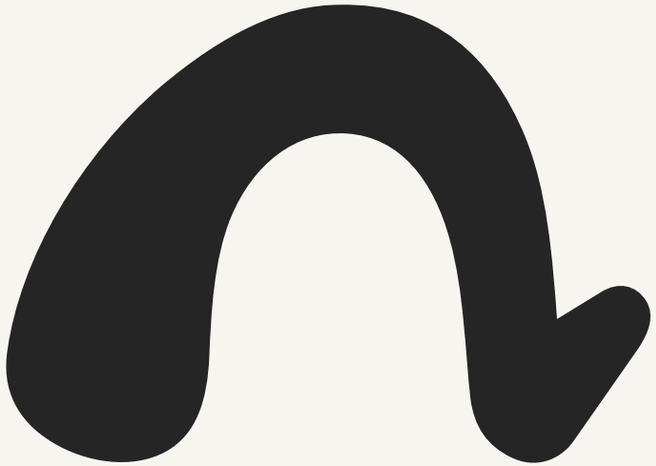

A small moment of play. A studio built to go further.

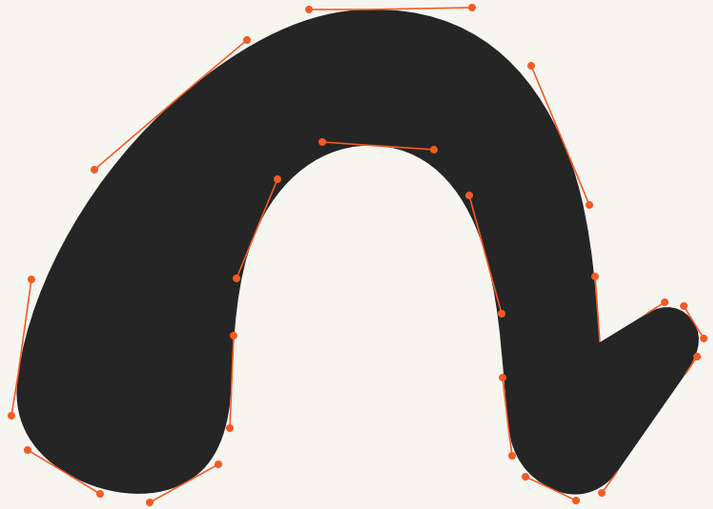

Nante comes from Rocinante. The bouncing initial carries
the spirit of a ride: a simple exchange that opens a little world of entertainment.

Version 1.0.0 / 05 October 2026 / Nante Studio

The geometry

A compact initial with a broad arch and an upturned terminal.

720 by 516 unit field. One connected silhouette.

Red lines and dots show the actual cubic control handles used in the master.

The open counter keeps the initial readable. Optical balance guides the curves.

Color

Charcoal is primary. Silver reverses on dark surfaces. Vermilion is an optional accent.

Vermilion

#F45A24 / RGB 244, 90, 36

Ink

#252525 / RGB 37, 37, 37

Graphite

#252525 / RGB 37, 37, 37

Silver

#C7C7C7 / RGB 199, 199, 199

Paper

#F7F5F0 / RGB 247, 245, 240

White

#FFFFFF / RGB 255, 255, 255

Ink on vermilion: 4.62:1. Silver on graphite: 9.07:1.

Use ink for small text on orange. RGB is authoritative; proof print conversions.

Logo + name

Use the horizontal lockup by default. Use the stacked lockup in centered layouts.

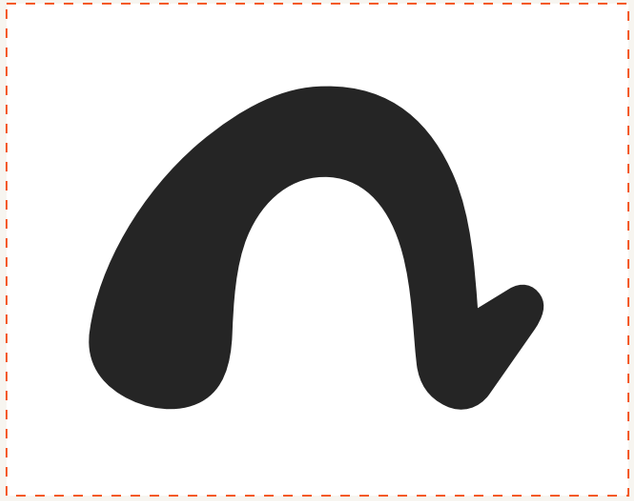

Lettering is outlined for portability. Keep its spacing and proportions intact.

Space and scale

Give the identity room to be recognized.

Clear space = 1/4 of the symbol height.

16 px 24 px 32 px 48 px 64 px

nante studio

Lockup minimum: 160 px wide.

Symbol minimum: 16 px. Prefer 24 px or larger outside browser favicons.

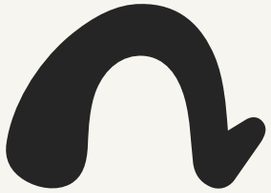

Do not stretch, rotate, add effects, alter the path or change the mark-to-name spacing.

Applications and handoff

One geometry, applied consistently across the studio and its operator app.
